

Design documents

My website will be named “Let’s Learn to knit” and it will be very simple design and will help teach beginner’s how to knit. It will be black and white (white background, black lettering) with pictures of yarn, needles, and people knitting.

My pages will comprise:

1. Front Page (based on index.html), which will contain the photo carousel and smaller needle, yarn, and people knitting photos.
2. About Page (based on about.html), which will contain photos of the instructors and a few photos of their completed projects.
3. Knitting Tutorials Page (based on blog-home-1.html), which will contain pictures of types of projects to make and types of knitting stitches to learn.
4. Contact us (based on contact.html), which will have a map, address, and the ability to send us a message.

I looked at other websites for ideas and inspiration and to see what I liked and didn’t like. These websites had a nice, clean look that I prefer and thought I could emulate.

Spruce Crafts website: <https://www.thesprucecrafts.com/learn-to-knit-2116465>

Martha Stewart website: <https://www.marthastewart.com/854324/how-knit>

Wooly Ventures website: <http://www.woolyventures.com/best-free-knitting-patterns-for-learning-to-knit/>

Purls Soho website: <https://www.purlsoho.com/>

My target audience will be beginners, both children and adults. I will design the site with those in mind that have never learned to knit, or need to just refresh their long forgotten skills.

All my pictures were taken from <http://www.pexels.com>, a stock photo website that allows use of photos under the Pexels license, found [here](#). This means that you can use the photos for free for personal and commercial/non-commercial use.
